Our Colloidal Silver is always Made in Small Batches and ALWAYS FRESH!

What is Colloidal Silver?

Colloidal silver is the suspension of sub-microscopic silver nano-particles in water. Silver is an ancient and natural all-purpose healing agent. It wipes out bacterial infections in a safe and clean manner, without compromising our immune system like antibiotics do.

History of Colloidal Silver:

Before the invention of antibacterial soap, colloidal silver was used as a disinfectant. Silver is effective at both preventing and combating bacterial illnesses and infections because it does not corrode. In ancient times silver was used in wound dressings and it was frequently used for the same purposes in America following the Civil War. It is also why churches use silver chalices in Communion to stop disease spreading through the congregation.

Silver was used medicinally in the mid-20th century to treat disorders such as epilepsy, gonorrhea and colds. It was also used in the past in eye drop solutions for ophthalmic issues. Compounds of colloidal silver were used topically as an antiseptic, germicide and disinfectant agent. Early 20th Century western medicine used silver as a prime antibiotic and anti-fungal until the 1930s.

Studies Suggest that Colloidal Silver is overall effective at:

- Kills fungal infections, viruses and bacteria.
- Scientists in the 1980's discovered 650 different types of pathogens that were rapidly destroyed when exposed to small amounts of silver.
- Use topically to relieve the pain and discomfort caused by inflammation and swelling, speed up healing and aid in recovery.
- Soothes and cure eye infections like pink eye, conjunctivitis and sties.
- Treats ear infections & swimmer's ear
- A perfect treatment for minor cuts and scrapes. and treating burns. helps speed the repair of damaged tissues.
- Effective when used as a nasal spray, treating sinus infections
- Ability to fight bronchitis or pneumonia
- Gargling with silver is a fantastic way to pick up and remove the pathogens in your throat causing you all that pain! Brushing with it destroys pathogens.

Ways to use colloidal silver for self healing:

- 1) You can spray it onto burns to prevent infections and promote faster healing without scarring.
- 2) You can also spray or dab it onto ringworm, boils, herpes sores, and warts for faster healing.
- 3) If you're having bronchial problems or walking pneumonia, you can put some colloidal silver in a nebulizer and breathe it into your bronchial area and lungs directly.
- 4) Small amounts taken daily as a tonic will give what some call a second immune system to guard against flues and colds.
- 5) Colloidal **silver drops** can be used for ear infections without any harmful side effects. Some use it for eye and nasal infections as well. Perhaps it can be injected anally with an enema bulb to help cleanse the colon.
- 6) It can be applied topically for vaginal yeast infections or oral thrush (yeast infection). Could be useful for chronic jock itch as well.
- 7) Colloidal silver can be used by pregnant women to assist fetal development and easier delivery of the newborn child.
- 8) It can be taken early with the onset of a cold, flu, or bronchitis to get over it quickly without harming beneficial bacteria. Antibiotics kill good and bad bacteria.
- 9) Colloidal silver can be used successfully to combat MRSA infections. MRSA (methicillin-resistant Staphylococcus aureus) is a staph infection that can be fatal and is now resistant to antibiotics. It usually occurs during hospital stays, but has become rampant enough to originate outside hospitals.
- 10) There has been some success using colloidal silver with AIDS patients. It adds a layer of needed additional immunity while destroying existing pathogens.

Precautions:

It has no adverse side effects. It leaves beneficial bacteria intact. Reports of argyria (skin turning blue) are greatly exaggerated.

Many Uses of Colloidal Silver

1. Silver has shown the ability to wipe out common throat ailments such as strep.
2. Ten drops of silver in the ear can aid in wiping out ear infections.
3. Quality colloidal silver soothes and wipes out eye infections (conjunctivitis, sty).
4. Shown to treat rhinosinusitis in sheep, suggesting it can clear sinus and upper respiratory infections.
5. Silver ions have shown promise in inactivating influenza and maybe show promise for inactivating other viruses.
6. Silver nano-particles have shown success in promoting anti-inflammatory properties.
9. Over time, antibiotics lose their ability to combat infection. Silver has been shown to boost the immune system to fight infection.
11. Swishing silver in the mouth has been shown to prevent plaque buildup, tooth decay, and bleeding gums.
12. Silver promotes optimal digestion.
13. Digested silver quickly combats food poisoning.
14. Silver has the ability to kill mold (including black mold) and mildew on surfaces throughout the home.
15. Apply on cuts, sores, and boils promotes healing.
16. Applying to rashes can aid in soothing itches.
17. Has the ability to kill various fungi, including athlete's foot and nail fungi.
18. Used to kill staph infections, including MRSA.
19. Applying to burns, especially sunburns, can soothe and heal.
20. Has shown success in inactivating the herpes simplex virus.
21. Silver infused water has been used to support HIV/AIDS intervention.
22. Shown to kill cancerous cells and has been considered as an alternative treatment to chemotherapy.
23. Applied to insect bites provides relief from itches. Apply to infected area can kill ringworms.
24. Silver applied to the vaginal area can combat yeast infections.
25. Relief from jock itch can be found through applying silver around the affected area.
26. Silver's antibacterial properties can provide relief from acne breakouts.
27. Applying silver to the scalp can relieve itchy scalp and dandruff.
28. When ingested, silver shows promise in treating laryngitis.
29. Ability to kill single cell organisms allows it to treat eczema when applied to the affected area.
30. Silver shows promise in treating psoriasis.
31. Silver purifies water that has germ contaminants present.
32. Silver is used in many airline filters to prevent water borne diseases.
33. When applied in dairy products, silver has the ability to prevent salmonella growth.
34. Ketchup, mustard, relish, and other condiments get a prolonged life with the addition of silver.
35. Silver's anti-fungal, anti-bacterial, and anti-viral can help treat Lyme disease.
36. Silver's antiviral properties help combat the common cold.
37. When applied to the scalp, silver can promote hair growth.
38. Sixty-six percent of patients in a trial found that their warts regressed when silver was applied.
39. Silver's anti-microbial properties have shown promise in stopping asthma attacks.
40. When ingested, silver has the ability to combat Whooping cough.
41. Using colloidal silver regularly allowed one woman to treat her Multiple Sclerosis.
42. Can minimize symptoms of Crohn's disease.
43. When ingested silver can heal a pet's stomach ache.
44. Silver can heal pet skin issues such as rashes and ringworm.
45. When pets leave messes on the floor or carpet, silver can get rid of nasty odors.
46. Applying silver to cuts helps treat both human and pet infections.
47. Applying silver on cuts can prevent infections in pets.
48. Silver has the ability to keep pets fungi-free.
49. Colloidal silver can penetrate the large intestine and treat traveler's diarrhea and cholera.
50. Silver has the ability to inhibit both Hepatitis B & C viruses.
51. Keep Flowers Fresh - they will last twice as long by adding a little colloidal silver to their vase.
52. Get Rid of Pet Odors - If you have a cat who regularly 'sprays' or a dog who marks his territory, try dousing the area in a solution of colloidal silver. It is said to remove the odor and stop the pet marking in that spot again!
53. For dogs, use it for infections, minor cuts and wounds, eye and ear infections and ringworm. When administering orally, 5 to 10 drops twice a day is recommended. As a wound cleaner, apply several times a day on a cotton swab. Ear infections require a few drops daily for up to ten days, while for eye infections one drop three times daily should do the trick.
54. Cats can also be treated with colloidal silver. Holistic veterinarian, Karen Becker, recommends using it to treat feline problems like feline acne, tear stains, yeast infections, skin conditions and MRSA.
